---

Projects

Portfolio Website (2020)

- Built a Personal Website using HTML/CSS and Javascript that includes an about me section, showcases my coding projects, and ways to get in touch with me

Connect X (2022)

- Developed a Connect 4 Game in various programming languages including C, Javascript, Scheme, and Ruby, with two new features to personalize the size of the board and the amount of checkers needed to win the game

Reliable File Transfer over UDP (2022)

- The server reads a file and sends its data back to the client using sliding window protocol to ensure reliability in any packet loss, reordering and delay, and then the client writes the data into a new file.
